Dr. S. Vasudevan

Dr. S. Vasudevan working as a Principal Scientist at the CSIR-Central Electrochemical Research Institute, Karaikudi (India). Through his creative interdisciplinary, cutting-edge research Dr. Vasudevan has made extensive fundamental and applied contributions to the fields of renewable energy, water treatment, materials chemistry and electrochemical science and technology.

He has authored more than 95 scientific papers and has 12 technical patents to his credit. He has transferred many technologies to different industries that have great societal values.

He has travelled widely and has chaired many technical sessions at international conferences and symposia. He is a globally acclaimed scientist in the field of hydrogen energy, water treatment and batteries. He is also the recipient of several awards. Dr. S. Vasudevan is a distinguished leader of large research team and a brilliant organiser of scientific events.
